Software Artefacts

I value software development and building of communities around open-source software.

Since 1996, I'm co-developer of Moose an open-source software analysis platform — <http://moose.unibe.ch> used by Université of Bern, Lugano, Annecy, Louvain-la-neuve, Lille, Bruxelles, Santiago. More than 150 publications are based on Moose.

Since 2008, I'm co-developer of Pharo: a smalltalk inspired environment — <http://www.pharo-project.com>. Pharo is a fork from Squeak and we are rewriting large part of it. It is used by several companies, universities and research groups world-wide.
